

In the name of God
Curriculum Vita

Behrokh Farahmand

Ph.D in Molecular Genetic

(Associate Professor)

Influenza and other Respiratory Viruses

Pasteur Institute of Iran, Tehran, Iran.

Phone #: +98 (21)64112183

Fax #: +98 (21)66496517

Cell #: +912-3845336

Email: b_farahmand@pasteur.ac.ir & farahmand.b2@gmail.com

Education:

PhD (Molecular Genetic):NIGEB.

M.Sc(Biochemistry):Tarbiat Modarres university of Tehran IRAN

B.Sc(Chemistry): Tarbiat Moallem university of Tehran IRAN

Research project director:

- Immunogenicity and protectivity evaluation of vaccine candidate construct consist of immunodominant epitops of influenza virus surface proteins (hemagglutinin and neuraminidase) in prokaryotic system (no: 1262; accepted in 2021)
- Design, synthesis and evaluation of protective effect of inhaled form of antiviral peptides against influenza A virus hemagglutinin in mouse model (no: 1026; accepted in 2019)
- Evaluation of the neutralizing activity of antibodies induced by H5 influenza vaccines through production of lentiviral pseudovirus particle (no: 1067)
- Production and protectivity assessment of intranasal administration of polyclonal Antibodies against whole Influenza A/H1N1virus and conserved proteins (HA2& M2) in mice (no:944)
- Evaluation of the susceptibility to influenza virus in people suffering from Hypercholesterolemia and diabetes in terms of IFITM3 polymorphism rs12252-C(no:831)

- Prokaryotic production and Immunogenicity assessment of chimer Protein consisting of Influenza Virus conserved Domains of Hemagglutinin and Matrix proteins (3M2e-HA2) in mouse model.“2014-2016” (no:759)
- synthesis and Lab scale production of Sucrose monolaurate glycoester as a safe Biosurfactant .“2014-2016” (no: f13)
- Suspending MDCK cell line for large scale culture of influenza virus “2012-2014” (no:606)

Research project co-worker:

- Immunogenicity and safety evaluation of Pasto Covac Plus as the booster dose in Iranian adults aged from 18 to 80 who received two doses of Sinofarm and...(2022-2023)
- Evaluation of Covaxin Bharat India vaccine in symptomatic and asymptomatic further infection and vaccine escape variants detection "2021-2022"(no:1226)
- Optimizing the expression of the active form of neuraminidase in bacterial host to facilitate pharmacological studies against influenza (2022-2024)
- Long term clinical and serological assessment of confirmed COVID-19 infected individuals for finding re-infection cases during 1 year after onset of infection "2020-2021"(no:1158)
- Application evaluation of gemini surfactants as antiviral and virucidal (antiseptic) "2021-2022"(no:1129)
- Association of the host genetic risk factors with influenza disease severity 2020-2021"(no:1188)
- Study of serum Zn and Se levels and metabolomics of the serum of patients of Covid19 using 1HNMR spectroscopy 2020-2021"(no:1180)
- Isolation, characterization and molecular docking of active compounds of Phlomis plant and the study of their antiviral effect 2019-2020"(no:1188)
- Design, Cloning and expression of chimeric protein composed of the antigenic regions of hemagglutinin and conserved domains of influenza virus in Nicotiana benthamiana and immunogenicity assessment in mouse model. "2018-2020"(no:1183)
- Evaluation of protective and anti-influenza immunity of influenza virosome potency as carrier of plasmid expressing influenza M2 gene and GM-CSF as genetic adjuvant in BALB/c mice model"2018-2020"(no:)
- Expression of Hemagglutinin (HA) proteins in lento plant for production of virus-like particles as vaccine candidate"2017-2019"(no:6036).

- Application of avian Newcastle disease virus (NDV) in combination with influenza hemagglutinin Fusogenic membrane glycoproteins (FMGs) gene as novel therapy for murine model of human papillomavirus –induced cancer"2017-2019"(no:)
- Formulation of oil adjuvant with capability to inducing TH1 immune responses'2017-2018"
- Production of influenza virus M2 protein, Leshmania Major HSP70 and M2- HSP chimeric protein in prokaryotic system (E. coli) and assessment of its immunogenicity in mice."2012-2014" (no:611)
- Reconstituting a recombinant chimeric influenza virosome associated with VSV as a delivery system for insect and mammalian cell lines.(۲۰۱۴-۲۰۱۷)
- The Isolation and characterization of Recombinant Camelids' Nanobody Against G glycoprotein of Rabies Virus (2015-2017)
- Evaluation gamma inactivated influenza vaccine in inducing protective immune response by different adjuvant formulations for immurine influenza model(2023-2024)

- longgeminiApplication of avian Newcastle disease virus (NDV) in combination with influenza hemagglutinin Fusogenic membrane glycoproteins(FMGs) gene as novel therapy for murine model of human papillomavirus –induced cancer (2017-2019)
- Surveying of PF-573,228 effects oninteraction of rabies virus P protein.and FAK(2015-2017)
- Antiviral evaluation of crude extractsand organic fractions of eight Iranindigenous medicinal plants againstinfluenza virus (2019)
- Isolation, characterization and molecular docking of active compounds of Phlomis plant and the study of their antiviral effect against influenza virus(2019-2021)
- Design, Cloning and expression ofchimeric protein composed of theantigenic regions of hemagglutininand conserved domains of influenzavirus in Nicotiana benthamiana andimmunogenicity assessment in.mouse model (2020-2022)

- Virosome construction from Influenza virus to include Nucleoprotein gene as DNA vaccine against the virus. ."2014-2016" (no:762)
- Construction of a chimerical expression vector carrying influenza virus M₂ protein and HSP70 gene and protein expression in COS-7 and/or HEK 293 cells "2009-2010" (no:459)
- Expression of Human Influenza Hemagglutinin in BES (Baculovirus Expression system) for subunit vaccine production"2007-2010"(no:415)
- Immunogenecity of liposome containing influenza nucleocapsid protein and envelope glycoproteins; Vaccine developmental approach"2005"(no:280)
- Standardization of Islet cell isolation and purification for transplanation in diabetic mice."2001-2003".

- Evaluation of *Plasmodium Falciparum* protease to design inhibitor “1999-2001”(no:140).
- Extraction and purification of (NAD)H by *Saccaromyces Cervisiae* PTCC 5080 “1998-2000”(no:115).
- Purification of the delta-endotoxin and cytolytic proteins of *Bacillus Thuringiensis* Subsp H14 *Israelensis* and Inspection of toxin effect in Rat cell. “1998-2000”(no:180).
- Rapid test for morphine analysis in urine. “ 2002-2005” (no:1460).

Teaching & Advising:

- Molecular Biology
- Bioinformatic tools in protein vaccine design
- General Virology
- Protein Biochemistry
- General Biochemistry
- Nanotechnology

Thesis supervisor:

- Design, cloning and expression of Recombinant Antigen of SARS-CoV-2 containing Multi-Epitopes of Spike-Nucleocapsid Chimeric Protein for Serological diagnosis of COVID-19 disease(2021-2023) (PhD student: Sohrab Sam)
- Design and construction of a peptide vaccine containing hemagglutinin and neuraminidase type A immunodominant epitopes in the prokaryote system (*Escherichia coli*) and assessment of antibody responses and protection in the mouse model(2020-2022) (PhD student: Mina Mirzaee)
- Design and Production of a epitope based universal vaccine influenza viruses A and B in prokaryotic system and evaluation of its immunogenicity and protection in mouse model(2020-2022) (PhD student: Alireza Jalalvand)
- Production and purification of influenza B virus recombinant Nucleoprotein antigen and preparation of its polyclonal antibody for use in diagnostic tests(2019-2020)(student: Behzad Tafaghodi)
- Cloning and expression of influenza A virus recombinant Noraminidase antigen for use in diagnostic tests.(2019-2020) (student: Zahra Latif).
- Prokaryotic expression and purification of conserved matrix protein I (M1) of influenza A virus, to be used in broadspectrum subunit vaccine cocktails.(2019)(Student: Marjan Manouchehri)
- Design, Production and protectivity assessment of intranasal administration of peptide derived antibody C05 against Influenza A virus Hemagglutinin protein in mice model(2019-2021)(PhD student: Shima Gholami)
- Construction of a Chimeric subunit vaccine consisting of HA2 and NP influenza A virus Coserved proteins and immunogenicity assessment using MF59 as adjuvant in animal model(2018-2020))(PhD student: Fatemeh Karimi)
- Production of a subunit vaccine cocktail containing influenza virus conserved proteins and immunogenicity assessment using sucrose ester as adjuvant in animal model(2017-2020))(PhD student: Ali Torabi)

- Cloning & expression of influenza virus A/H1N1 hemagglutinin conserve domain (HA2) & nucleoprotein (NP) gene caset in Esherchia coli(E. coli) (2016-2017)(student: Fatemeh Morshedi)
- Purification of Influenza A (H1N1) Nucleoprotein and preparation of its Polyclonal Antibody in Rabbits(2016-2017)(student: Mehdi Alikhani)
- Polyclonal antibody Production against HA1 recombinant proteins(2015-2016)(student:Fatemeh Khosravi)
- Design, construction and expression of tri-fusion protein consist of Nucleoprotein(NP), hemagglutinin conserved domain(HA2) and three copy number of matrix protein2 ectodomain (3M2e) of influenza virus A(H1N1) in prokaryotic system (E.coli)(2014-2015)(student: Shekoofeh Hatami)
- Construction & expression gene casset of influenza virus A/H1N1 hemagglutinin conserve domain (HA2) & triplet matrix protein 2 ectodomain (3M2e) & Leishmania major HSP70 as fusion protein in Esherchia coli(E. coli)(2014-2015)(student: Elahe Nazeri)
- Polyclonal antibody Production against HA2 & M2 recombinant proteins in order to serological methods for influenza virus detection(2013-2014) (student:Somayeh Zamani)
- Cloning & expression of influenza virus hemagglutin small subunit (HA2) protein in *E. coli* (2012-2013)(student: Atieh Akbari)
- Construction & expression of influenza virus A/H1N1 hemagglutinin small subunit (HA2) & triplet matrix protein 2 ectodomain (3M2e) as fusion protein in *E. coli* (2012-2013)(student: Neda Jalili)

Thesis advisor:

- Prokaryotic production of chimeric proteins containing conserved regions of hemagglutinin, matrix protein and nucleoprotein influenza virus (A / H1N1) and its immunogenicity in a mouse model(2017-2019)
- Evaluation the relation between the physiological adverse effects of high doses of tramadol with Gene polymorphism cytochrome P450 Enzymes (CYP)(2017-2018)
- Phylogenetic and molecular analysis of genomic HA1(Hemagglutinin) fragmen in influenza A(H3N2) virus isolated from iranian pateintst (2017-2018)
- Immunological studies of HIV-1 Tat-Nef antigen in two recombinant protein and DNA construct modalities in Balb/c mice model (2015)
- Gene isolationand cloning of ST6GalNAc V (siat7e) derived from human brain tumor tissue (Dec 2013)
- Extraction and cloning of a human st6GalNAc V from breast cancer cell line (Dec 2013)
- Determination of glycosylation composition in influenza virus Hemagglutinin glycoprotein (Aug 2009)
- Biochemical study of standard method of islet cells isolation and purification for treatment of streptozotocine - induced Diabetic rats by transplantation(Mar 2004)

Training Course:

- Acquaintance with concept of Industrial Microbiology in Iranian Research Organization of Science and Technology
- Amino acid analysis of peptides and proteins (electronic course work) in Pasteur Institute
- Two dimensional electrophoresis and its applications in proteomics (electronic course work) in Institute Pasteur
- Bioinformatic workshop(2014)
- Immunoinformatic workshop(2014)
- DNAsis Max workshop
- fermentation workshop

Reviewer for journals:

- PLOS ONE
- Biotechnology letters
- Protein and peptide Letters
- Joundishapoor Journal of Microbiology
- Iranian journal of biotechnology
- Medical journal of islamic republic of Iran
- Journal of general virology
- Iranian Journal of immunology
- Gastroenterology and Hepatology From Bed to Bench

Workshop performances:

- As scientific Manager of pasteur Institute of Iran Summer school from 2010-2018
- Contribution in pasteur Institute of Iran Summer school from 2010-2018 as lecturer On: (Bioinformatic tools in protein vaccine design, SDS-PAGE and Western Blotting)
